This application is in condition for allowance except for the following formal matters:

***Election/Restrictions***

Claims 1-20 are allowable. The restriction requirement between the species, as set forth in the Office action mailed on 19 March 2008, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 9-20, directed to non-elected species, are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Objections***

Claims 1, 4, 7, 12, 13, 16, 18, 19 and 20 are objected to because of the following informalities:

- Claim 1 recites the limitation "the transport point" in lines 6-7. There is insufficient antecedent basis for this limitation in the claim. It appears as though the applicants may have intended the phrase to be "the transfer point". Please amend appropriately.
- Claim 4 recites the limitation "the writing point" in line 3. There is insufficient antecedent basis for this limitation in the claim.
- Claim 7 recites the limitation "the magnification" in line 2. There is insufficient antecedent basis for this limitation in the claim.
- Claim 12 recites the limitation "the writing point" in line 3. There is insufficient antecedent basis for this limitation in the claim.

- Claim 13 recites the limitation "the writing point" in line 3. There is insufficient antecedent basis for this limitation in the claim.
- Claim 16 recites the limitation "the magnification" in line 2. There is insufficient antecedent basis for this limitation in the claim.
- Claim 18 recites the limitation "the magnification" in line 1. There is insufficient antecedent basis for this limitation in the claim.
- Claim 19 recites the limitation "the magnification" in line 1. There is insufficient antecedent basis for this limitation in the claim.
- Claim 20 recites the limitation "the magnification" in line 1. There is insufficient antecedent basis for this limitation in the claim.
- The applicants are advised to check for any other possible errors which may need to be addressed.

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

Claims 1-20 are allowed.

Art Unit: 2852

The following is an examiner's statement of reasons for allowance: Prior art does not disclose or suggest the claimed "wherein when the size of the image on the image carrier is larger than the size of the sheet transported toward the transfer point, the size of the image on the image carrier to be transferred to the midstream of the sheet after detection of the sheet edge position by the detecting means is changed, based on the detection results from the detecting means, and subsequent image formation to the sheet continues to be performed according to this image on the image carrier whose size has been changed" in combination with the remaining claim elements as set forth in claims 1-20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
